

451 Research announces JupiterOne (LifeOmic) as a Q2 2019 Firestarter innovation award recipient

JUNE 27 2019

By Simon Robinson, Christian Renaud, Matt Aslett

The 451 Firestarter award recognizes organizations for exceptional innovation and disruption in their market. Based on their insights and expert opinion of long-term trends and the competitive landscape within the industry, the 451 Research analyst team, on a quarterly basis, nominates technology firms of any size and age.

THIS REPORT, LICENSED TO JUPITERONE, DEVELOPED AND AS PROVIDED BY 451 RESEARCH, LLC, WAS PUBLISHED AS PART OF OUR SYNDICATED MARKET INSIGHT SUBSCRIPTION SERVICE. IT SHALL BE OWNED IN ITS ENTIRETY BY 451 RESEARCH, LLC. THIS REPORT IS SOLELY INTENDED FOR USE BY THE RECIPIENT AND MAY NOT BE REPRODUCED OR RE-POSTED, IN WHOLE OR IN PART, BY THE RECIPIENT WITHOUT EXPRESS PERMISSION FROM 451 RESEARCH.

REPORT REPRINT

JupiterOne (LifeOmic)

Nominated by Fernando Montenegro, Principal Analyst, Information Security

JupiterOne has earned a Q2 2019 451 Firestarter award for creating a cloud security platform that works alongside the other technologies an organization uses. Security practitioners see cloud platforms as one more environment they need to focus on, and many times there are important links between the cloud platform and the rest of the organization's IT footprint.

The 451 take

JupiterOne offers a combination of an underlying graph structure that can easily model complex relationships and connectors for other modern security components. Taken together, these features help to deliver more efficient security and compliance use cases. JupiterOne views cloud platform security as part of a broader modern, cloud-native environment, where the relationships between elements are critical, and individual customer needs will require supporting multiple technology options. We agree, and as such are excited to recognize JupiterOne as a 451 Firestarter.

More about JupiterOne

JupiterOne is an outgrowth of LifeOmic's innovation to help organizations comply with healthcare initiatives such as HITRUST, where it has enabled organizations to significantly reduce the time and effort required to demonstrate compliance and remediate gaps. It takes a graph approach to following connections between various points in cloud architectures – from endpoints to 'cloud native' assets and supporting resources – and enables security and compliance teams to visualize relationships, validate compliance and identify exposures more readily. Its flexible architecture is open to any integratable technology. This supports straightforward expansion and positions the technology well for giving security and compliance teams better visibility and policy-based control around multi-cloud environments as well.

ABOUT 451 FIRESTARTERS

The 451 Firestarter award recognizes organizations for exceptional innovation and disruption in their market. Firestarters are awarded quarterly to technology firms of any size and age. Awardees are nominated by the 451 Research analyst team based on their own insights and expert opinion of long-term trends and competitive landscape, and their in-depth conversations within the industry. Nominations are based on a combination of factors, including uniqueness, strategic and technology vision, and the disruptive potential of the organization's technology. Award recipients fall within the four key technology themes of 4SIGHT, the 451 Research framework for understanding the evolution of the digital transformation landscape: Contextual Experience, Invisible Infrastructure, Pervasive Intelligence and Universal Risk.
